Aviation Fuels and Synthetic Aviation Turbine Fuel (SATF) International Standards Seminar

February 16-18, 2027 | Tokyo, Japan

THE AVIATION FUELS AND SYNTHETIC AVIATION TURBINE FUEL (SATF) INTERNATIONAL STANDARDS SEMINAR

This seminar will provide an opportunity to communicate and describe some of the unique approaches developed for evaluation and specification development for aviation fuels. The seminar will also seek to identify areas of coordination and collaboration on research initiatives and policy development with the shared goal of mitigating the climate and environmental impact of aviation.

ABOUT THE EVENT

The Aviation Fuels and Synthetic Aviation Turbine Fuel (SATF) International Standards Seminar is organized by ASTM Committee D02.J on Aviation Fuels to provide a focused opportunity to engage with the Asian aviation community.

WHO SHOULD ATTEND

This seminar will be of interest to jet fuel producers, laboratories that test jet fuel, airlines, aircraft and aircraft equipment manufacturers, civil aviation authorities and regulators, as well as academia and research institutions.

KEY TOPICS THAT WILL BE ADDRESSED INCLUDE:

- ASTM standards and their role in controlling aviation fuel supply
- How ASTM enables the market entry of sustainable jet fuels
- Sustainability policies and objectives that drive the demand for sustainable jet fuels
- ASTM standards utilized to evaluate, qualify, and control synthetic jet fuels.
- The critical technical aspects of synthetic jet fuels from the perspective of the engine and aircraft manufacturers.

REGISTRATION AND HOTEL INFORMATION

Registration now open. The event will be held at the Hilton Tokyo.
